EDUCATION

- B.N.M Institute of Technology** Bengaluru, India
Bachelor of Technology in Artificial Intelligence and Machine Learning
- CGPA: 9.2/10.00 Aug 2023 – Present
- D.A.V. Public School, Gandhinagar** Ranchi, India
Senior Secondary (XII) – CBSE | Percentage: 78% 2022
- St. Michael's School** Ranchi, India
Secondary (X) – CBSE | Percentage: 88% 2020

SKILLS

Languages & Web: Java, Python, C, HTML, CSS, JavaScript, Django, Bootstrap, React, Next.js, REST APIs
AI/ML & Data: TensorFlow, Scikit-learn, Pandas, NumPy, MATLAB, GenAI, RAG, LangChain, Hugging Face, LLMs
Tools & Core CS: Git, Github, Docker, MongoDB, Firebase, SQL, ChromaDB, Matplotlib, Seaborn, DSA, OOP

EXPERIENCE

- Stygit** Hybrid
Data Science Intern August 2025 – October 2025
 - Developed an automated data curation pipeline to clean and standardize 10,000+ images for an AI fashion recommendation system, reducing model training time by 20%.
 - Built a human detection and segmentation pipeline using TensorFlow, YOLOv8, OpenCV, and MediaPipe, integrating custom algorithms for skin tone and body shape analysis.
 - Containerized system workflows with Docker to ensure scalability and reproducibility, successfully deploying the tailored recommendation engine.
- Central Coalfields Limited (CCL)** Ranchi, India
Software Engineer Intern June 2025 – July 2025
 - Developed real-time IoT data pipelines to process underground metrics (gas levels, movement) and applied time-series analysis (fbprophet), improving anomaly-detection accuracy by 15%.
 - Engineered automated hazard alerts in collaboration with mining engineers to align with operational needs, significantly reducing false alarms and accelerating emergency response times.
 - Technologies: Python (Pandas, NumPy), Time Series Forecasting (fbprophet), Machine Learning, IoT Data Processing.

PROJECTS

- InnerBalance – Adaptive Clinical Screening** | [GitHub]
 - Engineered an LLM-driven platform inspired by a NIMHANS initiative, replacing traditional 10-question forms with a customized 2-step conversation to save psychiatrists' session time.
 - Safeguarded patients from AI misinformation by restricting all application reasoning strictly to medically tested guidelines using a RAG architecture.
 - Technologies: Python, Django, Next.js, LangChain, RAG, Meditron LLM, Chroma DB, REST APIs.
- Drishti – Real-time Project Monitoring System** [GitHub]
 - Developed a real-time project tracking platform to monitor progress, manage issues, and improve team coordination.
 - Implemented automated report validation, data consistency checks, and email-based real-time notifications.
 - Integrated a chatbot assistant to provide instant responses to investigator queries on project data.
 - Technologies: Python, Django, MongoDB, React, REST APIs, Email Automation, Chatbot Integration.
- NewsForge – Personalized Content Ecosystem** | [GitHub]
 - Architected a GenAI news platform using Google Gemini 1.5 and LangChain, optimizing real-time data pipelines for dynamic, personalized content delivery.
 - Automated multi-format content generation, integrating the Unsplash API for contextual visuals and gTTS for audio summaries to enhance accessibility.
 - Technologies: Python, LangChain, Streamlit, Firebase, Google Gemini, Unsplash API, gTTS.

PUBLICATIONS

- Dynamic Traffic Signal Control for Emergency Vehicle Priority** [IEEE Link]
 - Published in: 4th IEEE International Conference on Intelligent Information Technologies and Computer Engineering (ICIITCEE), Jan 2026, Bangalore, India.
 - Publisher: IEEE.
 - Co-authors: Gopal Krishna Y J, Pradip Kumar Das, Sunitha R.
 - Proposed and evaluated a real-time adaptive traffic signal control framework leveraging Preemptive Signal Orchestration (PSO) to enable efficient ambulance prioritization in urban road networks.

ACHIEVEMENTS & CERTIFICATIONS

- Finalist, Unisys Innovation Program (UIP) 17** Feb 2026 – Present
Built “Vishwa-Karma,” an Agentic AI B2B supply chain solution standardizing rural artisan production for corporate procurement.
- CompTIA Security+ (SY0-701) Training** | Udemy March 2026
- Career Essentials in Generative AI** | Microsoft & LinkedIn Feb 2025

POSITIONS OF RESPONSIBILITY

- **Google I/O 2025** Bangalore, India
Stage Manager – Android Track *July 2025*
 - **Led stage operations for the Android track**, coordinating nationwide teams and managing 5000+ global participants to ensure smooth event execution.
- **Kalabhageerathi Club** Bengaluru, India
Lead Guitarist *October 2023 – 2025*
 - **Directed musical arrangements and live performances**, coordinating rehearsals and contributing to creative.
